

Fiat NEW 500C ELECTRIC 500 87 KW 118HP

ENGINE

Fuel Type	Electric
Battery Capacity	42 kwh
Max. power output hp (kW – EC)	118 (87)
Peak torque Nm (kgm – EC)	220

TRANSMISSION

Gearbox	Automatic
---------	-----------

PERFORMANCE

Acceleration 0-62 mph (s)	9
Top speed (mph)	93
Max Tow Weight - Braked Trailer	N/A

FUEL CONSUMPTION & EMISSIONS*

Electric consumption (WLTP, combined) kWh/100km	14.5
CO2 emissions (g/km)	0
BIK rate	N/A

STYLE

Interior specification	Black Fabric Seats / Body Coloured Dashboard / Black
Colour	Rose Gold
Wheels	16" Alloy Wheels

PRICING

Starting OTR price	£ 34,195.00
Options /Accessories	£ 600.00
OTR price including Options /Accessories	£ 34,795.00

KEY FEATURES

- 10.25" Touchscreen Infotainment with Navigation
- x1 Front USB Port (Charging, Data Transfer & Screen Mirroring)
- Uconnect Live via TBM - Europe
- Passive Entry & Keyless Go
- Premium Wrapped Steering Wheel with Audio Controls
- TFT 7" Digital Instrument Cluster
- Wearable Key
- EV One Pedal Driving
- AEBS (advanced emergency braking syst
- Rear Foglights
- E-call (SOS)
- Electronic Parking Brake
- LED Daytime Running Lights
- LED Rear Lights
- Wireless CarPlay / Android Auto
- 6 Speaker Sound System
- DAB Radio
- x2 Front USB Ports (Type A+C Charging Only)
- Automatic Air Conditioning
- Central Console with Storage Space
- Cruise Control
- Keyless Go
- EV Mode Selector
- Mode 3 Charging Cable
- Rain Sensor
- Attention Assist (Drowsiness Detection)
- Rear Head Restraints
- Traffic Sign Information
- Traffic Sign Recognition (TSR)
- Body Coloured Door Mirrors

OPTIONS/ACCESSORIES

- Metallic Paint

FIAT

Fuel economy, emissions and running costs

Fiat NEW 500C ELECTRIC 500 87 KW 118HP

Running costs

Total monthly electricity cost*
£54

VED (road tax) for 12 months

Year 1
£0

Year 2 onwards
£0

Year 1 rate is linked to CO₂ emissions (the lower your vehicle's emissions the less you have to pay), fuel type and emission standard (diesels only).

Electric range (combined)

This tells you roughly how far you might be able to drive on a full electric charge, averaged across various journey types (city to motorway). Whilst achievable in ideal conditions, 'real world' day-to-day journeys are never the same and affected by many external factors, meaning your individual electric range may well be different.

190.8 Miles

Tailpipe Emissions

CO₂ is the main greenhouse gas responsible for climate change

Emission standards

Ultra Low Emission Vehicle **ULEV**

Zero Tailpipe Emissions Vehicle **ZEV**

Air quality emission zone compliance

Clean Air Zones (England and Wales) **CAZ**

Ultra Low Emission Zone (London) **ULEZ**

This vehicle meets the emissions standard for private cars set by government under the Clean Air Zone (CAZ) framework for England and Wales currently in place until 2025. Stricter CAZ standards and restrictions could then apply. Some local authorities may also impose more stringent controls in certain areas. A ULEV meets the current government standard for an Ultra Low Emission Vehicle, stricter standards could apply in the future.

Fuel economy

Environmental information: A guide on fuel economy and CO₂ emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO₂ emissions. CO₂ is the main greenhouse gas responsible for climate change.

Make/model:	Fiat NEW 500C ELECTRIC 500 87 KW 118HP	Engine capacity (cc):	N/A
Fuel type:	Electric	Transmission:	N/A
Fuel consumption:			
Drive cycle	Litres/100km	Mpg	
Low (city)	N/A	N/A	
Medium (town)	N/A	N/A	
High (rural)	N/A	N/A	
Extra High (motorway)	N/A	N/A	
Combined average			
Electricity consumption:	14.5 kWh/100km		
Carbon dioxide emissions:	0g/km		

All fuel economy and emissions figures are from the WLTP laboratory test and specific to this car. These provide a realistic and reliable indication of what's achievable in ideal conditions. However, as no test can fully reflect real-world driving conditions and behaviour, there will always be some differences.

* Estimated monthly electricity cost is based on an average of 10,000 miles per year. Calculation uses the WLTP combined electricity consumption figure and electricity cost of: £0.28/kWh (at July 2022).

HM Government
